16. Social status	26
17. Social dissuasion	27
18. Satisfaction with choice	29
19. No scale ítems (in table 2):	30
A.3 Social and demographic characteristics of "ser Profe UDP" (mentored group) against not interested group:	38
1. Gender	38
2. Grade	39
3. Academic performance (sel-reported)	39
4. Parent's educational level (student-reported).	41
5. Household Income tier (self-reported)	43

A.1. Reliability measures fit choice dimensions

MOTIVATION FACTORS:

1. Work with children/adolescents

```
. alpha fc24 fc12 fc53
```

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    3.642266  
Number of items in the scale:    3  
Scale reliability coefficient:    0.9386
```

2. Enhance social equity

```
. alpha fc35 fc8 fc16
```

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    1.346268  
Number of items in the scale:    3  
Scale reliability coefficient:    0.7978
```

3. Shape future of children/adolescents

```
. alpha fc11 fc6 fc18
```

```
Test scale =
```

```
mean(unstandardized
```

```
items) Average interitem
```

```
covariance:                      1.154489  
Number of items in the scale:    3  
Scale reliability coefficient:    0.7899
```

4. Make social contribution

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    .7494177  
Number of items in the scale:    3  
Scale reliability coefficient:    0.6342
```

5. Job security

```
. alpha fc32 fc17 fc13
```

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    1.05832  
Number of items in the scale:    3
```

Scale reliability coefficient: **0.7441**

6. Job transferability

alpha fc38 fc44 fc20

Test scale = mean(unstandardized items)

Average interitem covariance: **.9788001**
Number of items in the scale: **3**
Scale reliability coefficient: **0.6455**

7. Time for Family

. alpha fc34 fc43 fc23 fc26 fc7

Test scale = mean(unstandardized items)

Average interitem covariance: **1.076521**
Number of items in the scale: **5**
Scale reliability coefficient: **0.7882**

8. Intrinsic career value

. alpha fc46 fc51 fc15

Test scale = mean(unstandardized items)

Average interitem covariance: **2.395815**
Number of items in the scale: **3**
Scale reliability coefficient: **0.8584**

9. Self-perceived ability

. sum fc33 fc58 fc31
alpha fc33 fc58 fc31

Test scale = mean(unstandardized items)

Average interitem covariance: **2.714172**
Number of items in the scale: **3**
Scale reliability coefficient: **0.8784**

10. Previous teaching

. alpha fc36 fc49 fc27

Test scale = mean(unstandardized items)

Average interitem covariance: **.9182979**
Number of items in the scale: **3**
Scale reliability coefficient: **0.7753**

11. Social influences

```
. alpha fc56 fc21 fc37
```

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    2.187416  
Number of items in the scale:    3  
Scale reliability coefficient:    0.8615
```

12. Fallback Career (no scale)

```
sum fc60
```

Variable	Obs	Mean	Std. Dev.	Min	Max
fc60	1112	4.730216	2.032381	1	7

PERCEPTION FACTORS

13. Expert career

```
. alpha fc25 fc22 fc14
```

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    .992533  
Number of items in the scale:    3  
Scale reliability coefficient:    0.7882
```

14. High demand

```
. alpha fc40 fc47 fc30
```

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    .6450294  
Number of items in the scale:    3  
Scale reliability coefficient:    0.7201
```

15. Good salary

```
. alpha fc9 fc48
```

```
Test scale = mean(unstandardized items)
```

```
Average interitem covariance:    2.035715  
Number of items in the scale:    2  
Scale reliability coefficient:    0.8176
```

16. Social status

```
. alpha fc57 fc28 fc5 fc54 fc52
```

```
Test scale = mean(unstandardized items)

Average interitem covariance:      .9351471
Number of items in the scale:      5
Scale reliability coefficient:      0.7552
```

17. Social dissuasion

```
. alpha fc55 fc50 fc39
```

```
Test scale = mean(unstandardized items)

Average interitem covariance:      1.312877
Number of items in the scale:      3
Scale reliability coefficient:      0.5613
```

18. Satisfaction with choice

```
. alpha fc42 fc59 fc19
```

```
Test scale = mean(unstandardized items)

Average interitem covariance:      2.801669
Number of items in the scale:      3
Scale reliability coefficient:      0.8927
```

A.2 One-factor anova, multiple comparison tests and cohen-d for significant differences

1. Work with children/adolescents

```
. oneway dim1 gpac, tab b
```
